**DID YOU KNOW?
Children Do Not Lie About Abuse**

Most children are not lying when they say that they were abused. Less than 5% of all allegations are intentionally false. It is more likely that children will refuse to tell about abuse than to lie about abuse. Several studies estimate that only about 6% of all children report sexual abuse by an adult to someone who can do something about it. The other 94% do not tell anyone or talk only to a friend. (And they swear their friend to secrecy.)
